 @ONBiomass

Who we are:

Ontario Biomass Producers is a group of Ontario farmers, exploring the sustainable production and marketing of biomass. This group is open to all Ontario farm operations, from small to large scale.

Non-farmers or organizations, engaged in the biomass industry, can participate at OBPC with an associate membership.

We are currently exploring:

- Marketing opportunities
- Production of purpose grown biomass crops
- Harvesting of crop byproducts
- Transportation and storage issues
- Generating or co-generating electricity from biomass
- Structure and financing options for a biomass production co-op
- Densifying of biomass (e.g. pelleting, briquetting)
- Biomass based heat energy
- Biomass as a feedstock for the production of fuels
- Biomass for the production of plastic products
- Biomass for production of composite fibre boards
- Animal bedding (dairy, poultry, equine, pet market, etc.)
- Biomass as substrate for mushroom farming
- Quality mulch for landscaping and vegetable farming
- Biomass for insulation products

Our Vision: *Profitable biomass markets for Ontario farmers!*
